215 E. Washington St.
Washington, IA 52353

Dear Sir or Mam

We have come up with three different proposals to improve the city fountain. Please reference the three quotes in this order Quote Q3317, Q3318, and Q3319.

Quote Q3317

We have prepared a basic package to change out the existing controls. This would give you newer updated controls; however it would leave the current existing lighting in the fountain. This includes the consturction, initial setup, and programming with a total of \$8245.42. A licensed plumber would still be needed to replace the valves.

Quote Q3318

We have prepared a package that would give you the next step. It has all of the options defined in the basic package plus it adds updated lighting. We will add LED lighting to give infinite color varieties. This would give you more color options and illuminations than what is currently in the fountain. The total of this Quote is \$18988.39. A licensed plumber would still be needed to replace the valves.

Quote Q3319

We have prepared another package that would get you even further. It has all of the options defined in both of the other two quotes plus it adds wireless for sound effect. Adding the wireless for sound effect gives you syncrinization with the water, the lighting and the sound. This includes speakers to look like basic rocks to hide them from the eye. The total of this Quote is \$22965.39. A licensed plumber would still be needed to replace the valves.
