

# Southeast Basin I&I Project

## Weekly Construction Update

The intent of this weekly update is to provide an overview of the construction completed and a projection of construction activities in the following week. It is intended to be a general overview and tentative in nature. Construction progress may differ from the information provided as a result of weather or other construction elements.

### **Construction Overview for the Week of August 25<sup>th</sup> – August 31<sup>st</sup>**

- Municipal Pipe Tool (MPT) completed the lining of several sanitary sewer pipe sections.
- MPT's subcontractor, Hagerty Construction completed replacement of pavement at point repair excavation locations.

### **What to Expect the Week of September 1<sup>st</sup> – September 7<sup>th</sup>**

- Municipal Pipe Tool's (MPT) subcontractor, Hagerty Construction, may continue with the replacement of a manhole at the south end of S. 3<sup>rd</sup> Avenue.
- MPT will continue with sanitary sewer lining repairs at various locations throughout the southeast basin.

The following pipe segments are planned to be lined this week:

- Pipe segments between N. 12<sup>th</sup> Avenue and N. 13<sup>th</sup> Avenue on E. 3<sup>rd</sup> Street.
- Pipe segment between E. Van Buren Street and Perdock Court.
- Pipe segment on E. Polk Street between S. 3<sup>rd</sup> Avenue and S. 6<sup>th</sup> Avenue.
- Pipe segment on S. 11<sup>th</sup> Avenue between E. Adams Street and E. Madison Street.
- Pipe segment on S. 12<sup>th</sup> Avenue between E. Adams Street and E. Van Buren Street.

### **What you need to know**

- Working hours are generally Monday-Friday (7:00 am to 9:00 pm). Work on the weekends and at night will require city approval.
- The contractor is required to notify property owners if work will impact access to property.
- Please contact your local service provider to report any utility outages.
- While the contractor is completing construction activities, roadway and driveway access may be temporarily restricted.
- Construction projects are fluid in nature and depend on many variables. Examples are poor weather, utility conflicts, unknown buried facilities, and fabrication schedules. We appreciate your patience and understanding as schedules are adjusted.
